

FERZ Consulting Website – Project Specification

Purpose

The FERZ Consulting website is designed to present the company as the **authoritative leader in deterministic AI governance**. Its goals are:

- Build credibility and trust with enterprise decision makers (CIOs, CISOs, CROs, compliance leaders).
 - Explain FERZ's patent-protected products, services, and methodologies.
 - Drive investor interest through clear representation of FERZ's intellectual property portfolio.
 - Enable lead capture via optimized contact forms and resource downloads.
 - Deliver a technically excellent platform that maximizes SEO, accessibility, and performance.
-

Desired Product Features

1. Core Pages

- **Homepage:** Clear positioning, hero statement, key differentiators, navigation to products/services.
- **Products Overview + Individual Product Pages:** Each product described with value, technical innovation, and IP status.
- **Services Overview + Individual Services:** Clear mapping of challenges, solutions, and outcomes.
- **Methodologies:** Technical deep-dives into frameworks like SCM, AI Capsule, MRCF.
- **IP Portfolio:** Listing of FERZ patents and IP with licensing opportunities.
- **Articles/Blog:** Regular thought-leadership content.
- **About / Contact / Privacy / Disclaimer** pages for compliance and credibility.

2. Contact & Lead Generation

- Multiple **contact forms** (4-5) across the site.
- Forms should submit securely using **serverless email integration** (Resend API).
- Responses must deliver directly to FERZ's team emails.
- Staging and production environments must keep form data safe.

3. Content Management

- Articles system where new posts can be **added dynamically** (with title, slug, content, and image).
- SEO metadata auto-generated per article (title, description, canonical URL, OpenGraph tags).
- Social preview images and schema must be supported.

4. Navigation

- **Vertical mega-menu** for products, services, methodologies, and resources.
- Clean separation of IP Portfolio navigation (custom menu options).
- Fully responsive design for desktop, tablet, and mobile.

5. Branding

- Preserve FERZ's **red accent color** for emphasis only.
 - Primary palette: muted neutrals, blues, greens.
 - Consistent use of Georgia font for articles, Inter/GoodTimes for other content.
-

Performance & Technical Requirements

1. SEO

- Full **on-page SEO** with SSR (Server-Side Rendering) using `vite-plugin-ssr`.
- JSON-LD structured data on **every page** (Organization, Product, Service, Blog, etc.).
- Canonical URLs, OpenGraph/Twitter cards, and sitemap/robots.txt auto-generated.

2. Performance

- Must achieve **90+ Lighthouse scores** across **Performance, Accessibility, Best Practices, SEO**.
- Aggressive **tree-shaking** and code splitting to minimize JS bundle size.
- Fonts optimized (WOFF2, preload critical).
- Images lazy-loaded and compressed (WebP/AVIF).
- Unused CSS/JS eliminated automatically.

3. Accessibility

- Semantic HTML structure with headings hierarchy.
- All interactive elements keyboard-navigable (tab index, aria-labels).
- Color contrast checked against WCAG standards.

4. Deployment

- Hosted on **Vercel** with staging and production branches.
 - Serverless functions (Vercel API folder) handle email form submissions.
 - Global CDN distribution for low latency.
-

How It Should Work (User Flow)

1. **Visitor lands on homepage** → immediately understands FERZ's positioning and can navigate to Products, Services, or Methodologies.
 2. **Explores offerings** → Each page highlights problems solved, mathematical guarantees, and FERZ's authority.
 3. **Structured Data and SEO tags** → Rendered server-side, so Google and LinkedIn see complete meta information.
 4. **Articles/blog** → Auto-generated metadata and schema; optimized for sharing.
 5. **Contact form submission** → Sent via Resend API; confirmation displayed to user; email delivered instantly to FERZ's team.
 6. **Performance** → Pages load under 2s on 4G mobile; no blocking scripts; smooth responsive UI.
 7. **Accessibility** → Screen readers and keyboard navigation fully supported.
-

Success Criteria

- ☐ All pages indexable and passing Google Rich Results Test.
- ☐ Lighthouse: Performance, Accessibility, Best Practices, SEO ≥ 90.
- ☐ Structured Data validates across all page types.

- ☐ Contact forms reliably deliver submissions.
 - ☐ Branding, typography, and navigation consistent with FERZ's identity.
 - ☐ Easy to maintain (articles and new pages added without breaking SEO).
-
